

## **ORAL DISEASE REPORT - 2008**

**You will be assigned or allowed to choose a disease in class to find information contained in the questions listed below. The discussion of your disease will be presented orally in class. It should last 3-5 minutes. We will start having these reports in class soon. You should start on this assignment NOW!**

### **Requirements:**

- 1. 10-15 power point slides for your presentation emailed to ksmith on date TBD before the oral presentation. Your slides must include 2 pictures that relate to your disease/research. Do not email until you are asked to. If I haven't received them by the date required you will receive a grade of 0 for this oral report. If you are not ready to present the oral report on the date determined you will receive a grade of 0.**
- 2. You will take the class to the URL that you feel best explains the disease if time allows.**
- 3. Do not read the following questions. Explain their answers in your oral report.**

- 1. Why did you choose this disease to research? If you know someone with this disease/condition, consult him/her for their input.**
- 2. What is the disease? Define it.**
- 3. What are the symptoms of the disease?**
- 4. What are the causes?**
- 5. What are the Rx's?**
- 6. What body system(s) are affected?**
- 7. What is the life expectancy of a person with the disease? Explain.**
- 8. Discuss the latest research that is being conducted concerning the disease.**
- 9. Give your own Hypothesis for a cure for the disease.**
- 10. List the URLs used on the last slide.**

**PLEASE REMEMBER a few of you at a time will be given a date to email your power point slide show. Do not email power points until you are asked to.**
